REASONS FOR ALLOWANCE

1. Claims 1, 3, 4, and 6-21 are allowed over the prior art of record.
2. Claims 2 and 5 were canceled.
3. The following is an examiner's statement of reasons for allowance: The Applicants has amended the independent claim 16 to be similar in scope to the previously allowed claims 1 and 9. As previously mentioned, the Applicant's arguments filed on 1/30/2007 are persuasive. The feature of claims 1 and 9 directed towards allowable subject matter is the feature including "a memory operatively connected to said control terminal of said output transistor, said memory being configured to store a signal on said control terminal from a previous cycle in which said output transistor was activated". The feature of claim 16 directed towards allowable subject matter is the feature including storing a signal on a control terminal of an output transistor from a previous operating cycle in which the output transistor was activated in a memory as a stored signal, said memory being operatively connected to said control terminal of said output transistor. Nakahira et al. generally teaches of a method for driving an electrical device as claimed but is lacking the structure of the memory circuit configured to operate in relation to the previous operating cycle, on the specific control terminal of said transistor. Therefore the above said features in combination with the other limitations of the above independent claims are found to be allowable over the prior art of record.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
